Guide to Patio Care

A new patio is a long-term investment and provides many years of service and enjoyment. To help you keep your paving looking its best for longer, we are providing a guide to assist you with maintenance.

Q – Can I use salt to de-ice my patio?

A – No. During freezing and thawing conditions, the use of salt can affect the appearance of the paving

Q - What can I use as an alternative for de-icing?

A - The only product we recommend is regular sand.

Q – Why do I need to seal my patio?

A – Sealing your patio will protect the surface against any materials that may cause stains

Q – How do I clean my patio?

A – Once the product is sealed it is easy to clean with soap and water.

Q – Why do the paving stones have dark patches?

A – This is due to differential weathering, where the surface of the paving has cured at different rates, causing darker variation on the paving. Generally this is exaggerated by the presence of efflorescence, which, once removed, will reduce the effect of the dark patches. As with efflorescence the dark patches will generally disappear with time.

Q – Can Bradstone Pavers be installed on a driveway?

A – No. Bradstone paving is only intended for patios and walkways where exposure to de-icing salts will not occur and should not be adjacent to driveways.

Q – What is efflorescence?

A – Efflorescence is a natural phenomenon and can occur with all cement-based products. It may appear randomly and will possibly appear more pronounced on coloured paving. The white bloom may give the impression that the colour is fading, but when wet, you will find that the efflorescence vanishes and the paving returns to its original shade. Be reassured that efflorescence has no detrimental effect on the performance of the paving and will generally disappear with time.

TAXES are Extra
Prices subject to change without notice.
All Returns MUST have proof of purchase and are subject to 20% restocking charge!

DELIVERY CHARGES =If Quantity X Delivery per Unit

1. Is greater than \$100.00, then Delivery is QUANTITY X DELIVERY PER UNIT
- 2(a).Is less than \$56.00, then QUANTITY X DELIVERY PER UNIT Plus \$44.00 -Zone 1
